

CMC 25 Arbor Pro

Built for the Tree Professional

Safer, non-slip outrigger pads

New arborist saw holder

The Heavy Duty Lift, the CMC 25 Arbor Pro (now available with safer, non-slip outrigger pads and a new arborist saw holder) is a self-propelled tracked aerial platform built for one of the roughest industries on this planet - the tree industry. Equipped with many exceptional time saving features, this reliable 25 metre working height lift has an impressive 14 metre outreach. With incredibly compact dimensions, this serious aerial work platform is capable of BIG performance.

Designed with 1 articulating/1 telescopic lower boom and 1 articulating/2 telescopic upper booms, plus articulating jib on the end. This combination allows for best work maneuverability and outreach. A quick release 180° rotating basket with triple safety locks, rounds out this great lift that is a pleasure to work with.

Standard basket size is 1.70 m wide. Other smaller basket sizes are also available to best fit your application. The CMC 25 Arbor Pro comes equipped standard with two stabilisation areas and 6 possible outrigger configurations. With incredibly compact dimensions this serious aerial work platform is capable of entering virtually any door. Quiet diesel engine/240v electric hydraulic power pack is standard. Also available with hybrid power source.
