The S41 is our largest and highest reach self propelled aerial work platform with 19m lateral outreach and 200kg basket capacity.

Minimum travel dimensions are 240cm x 2.1m x 8.5m (HxWxL). Three stabilisation area dimensions allow for stabilisation as compact as 3.99m x 7.58m min area dimensions. Smooth, easy to use control system with multiple toggles allows for a comfortable and safe operator ride.

Internet connectable control system means quick remote diagnostics and corrections, resulting in less expensive maintenance. The S41 work platform is built with 6 telescopic booms and articulating extendable telescopic jib, with 180° rotatable and removable basket.

Rotatable outriggers with special articulated “knees” allow for an extremely compact travel package. Hybrid power, quiet diesel engine and 380v three-phase electric hydraulic power pack for indoor use is standard.

SPECIFICATIONS

Max working height	41.0m
Max lifting height	39m
Max work outreach	16.0m
Platform capacity	200kgs
Turret rotation	Continuous
Boom rotation	360°
Basket rotation	+/-90°
Articulating jib	90°
Stabiliser base area (min)	3.99 x 7.58m
Platform basket	2 x 0.8 x 1.1m
Minimum length	8.5m
Minimum width	2.1m
Minimum height	2.4m
Gross weight	13,400kgs
